

# Packaging Material

*Packaging presents the first impression and constitutes a virtual show-window of the product. Besides carrying a fact-file on the product, it is, however, the first glance at the colors and quality of the wrapper that determines the appeal of the product.*

*We "Ahinsa Polyfilms Pvt. Ltd." are leading manufacturers of a wide variety of packaging material. With the range comprising laminates in rolls, pouches with center, three sided and six sided seals, stand up pouches with/without zip lock and other packaging forms, here our expertise lies in offering these in both standard and customized finish specifications. Our business operations are headed by five technocrats who have with them with more than a decade and a half's experience...*
